

Vikings and Dragons 1

In *How to Train Your Dragon*, Vikings travel across the sea, searching for dragons and Hiccup and his friends often use boats to get around the isle of Berk.

This week, your challenge is to build a Lego longship fit for a Viking crew - or how about a smaller boat for Hiccup and Toothless? Will it be a miniature or a big enough for minifigures? You decide!

Here's what you need:

- Bricks (curved and slope pieces are great for shaping the hull)
- Plates and tiles for the base
- Minifigures and accessories (helmets, swords, shields)
- Paper, pencil, and ruler (to make a sail)

Add a dragon head on the prow to keep sea monsters away!

Participants can show what they have made during the live session. If they would like their model shown in the Lego Club Gallery, please email pictures or videos of their creations to: Hannah@storysteam.com or share in the WhatsApp group.

Vikings and Dragons 1

Here is the little longship
I made during the pre-recorded session.

These are the elements I used.
