

## Vikings and Dragons 2

Vikings carved dragon heads onto their longships to scare away sea monsters. Maybe you added one to your Lego longship in the last session.

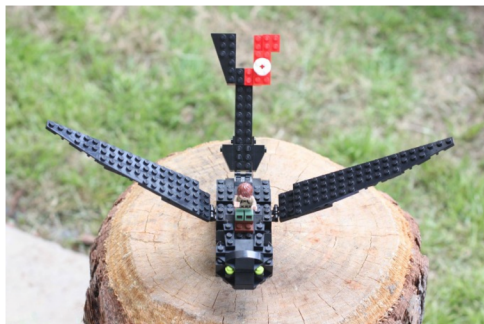

Dragons were a big part of Viking myths - and on the island of Berk, they're very real. In *How to Train Your Dragon*, Hiccup discovers that dragons aren't just scary creatures. With patience and trust, he learns to train Toothless and unlock his amazing powers.

This week, your challenge is to build your own Lego dragon. Can it flap its wings or breathe LEGO fire? Is it fierce and spiky, or fast and friendly like a Night Fury?

What you need:

- Bricks
- Plates
- Slope bricks
- Hinge and joint elements to enable the wings and tail to move.

Use your imagination - and don't forget to give your dragon a name!

Participants can show what they have made during the session. If they would like their model shown in the Lego Club Gallery, please email pictures or videos of their creations to: [Hannah@storysteam.com](mailto:Hannah@storysteam.com) or share in the WhatsApp group.

# Design your own dragon

Dragon Name: \_\_\_\_\_

Describe what it looks like  
(Colour, size, wings, spikes, tail, etc.)

---

---

What are its powers?  
(e.g. fire-breathing, flying, ice blasts, camouflage...)

---

Where does it live?  
(e.g. volcano, icy cave, deep forest, stormy island...)

---

Draw your dragon here:
